

INDIAN INSTITUTE FOR PRODUCTION MANAGEMENT

In order to help the industries better to meet the growing demand for trained technical Man-Power & to enhance the employability of fresh Degree & Diploma Engineers by making them more relevant to fulfill industry requirement, we are running the following two technical educational programmes since last 20 years:

- ✦ **Post Graduate Diploma in Engineering Management (PGDEM)**
- ✦ **Advanced Diploma in Maintenance Management and Condition Monitoring (ADMM & CM)**

These two courses are not only helping the Fresh Degree/Diploma Engineers to enhance their knowledge and employability but also industries as a whole, who are getting well trained and specialized manpower to optimize their production and minimize breakdowns.

PGDEM (Post- Graduate Diploma in Engineering Management)

Eligibility: Degree in Mechanical / Production / Industrial / Manufacturing / Electrical / Electronics & Instrumentation / Electrical & Electronics Engineering / appearing candidates can also apply.

The 10- month PGDEM course consists of 2 core modules of 5 months each with the following subjects:

COURSE COVERAGE:

CORE MODULE - 1	CORE MODULE - 2
<ul style="list-style-type: none">• Maintenance Management• Production & Operation Management• Project Management• Principles & Practices of Management• Operation & Maintenance of Equipment System<ul style="list-style-type: none">OMES – I (Mechanical Equipments)OMES – II (Electrical & Electronics Equipments)	<ul style="list-style-type: none">• Power Plant Management• Accounting & Finance for Non – finance Executives• Industrial Safety Management• World Class Manufacturing (WCM)• Project Work• Project Presentation & Viva

2. ADMM & CM (Advanced Diploma in Maintenance Management & Condition Monitoring)

Eligibility: Diploma in Mechanical / Production / Electrical / EEE / Manufacturing / appearing candidates can also apply.

The 6 – months ADMM & CM course consists of 2 core modules of 3 months each with the following subjects:

COURSE COVERAGE:

CORE MODULE - 1	CORE MODULE - 2
<ul style="list-style-type: none">• Maintenance Management• Operation & Maintenance of Electrical / Mechanical Equipment System• Condition Monitoring Techniques : WDA & Lubrication Management• Condition Monitoring Techniques : Infrared Thermography• Personality Development	<ul style="list-style-type: none">• Business Organization• Industrial Safety & Energy Conservation• Condition Monitoring Techniques : Vibration Monitoring & Analysis• Project Work• Project Presentation & Viva
