## Basics of Python Programming

**Python for Beginners**

**Registration Fee : Rs. 500.00 per Participant**

**Participation Certificate to all Registered Participant**

**Online Virtual Session with Hands On Practice**

**Scheduled During  
25th - 29th January, 2021**

**Click Here to  
Register Online**

## About the Course:

This 5-day course is designed for developers with experience of other languages who need to get up to speed on Python. At the end of this course the students will know the essentials of the Python language, how to use Python's module system to structure code, and how to approach the development of Python programs. We'll cover the core Python language and the standard library in detail. This course will cover various skills including text manipulation, modular programming, working with and retrieving data, interacting with files on your computer, and using some of the more popular third-party libraries (and getting them installed when and where we need them). The goal is to get participants up and running with Python in as short a time as possible.

## Importance of the Course:

- Understand how to install and use Python
- Understand the fundamental Python programming techniques and tools.
- Discover the history of Python and how it compares to other programming languages.
- Discuss its applications and the types of problems it can solve.

## Technologies Overview:

- File handling, Exception handling, Command line arguments, modules and packages
- Linear & Non Linear Data structures
- API's Integration with Python
- Python for Socket programming, SMTP, MQTT protocols
- Django Python Web frameworks
- Computer vision with python
- Algorithms with Python
